SKELETON EDITION

Just in time for Europe's most important watch week, **Carl Suchy & Söhne reveals the new Waltz N°1 Skeleton, which comes in an exclusive edition of five timepieces.** Designed by CEO Robert Punkenhofer, designer Rein Steger and watch maker Marc Jenni, the unique dial opens the view to the sophisticated skeletonized ultra-thin automatic movement, while its aesthetics retain the brand's fundamental visual identity. This Skeleton Edition gives pride of place to the synergy of cutting-edge design and technical watchmaking skill.

DESIGN: CARL SUCHY & SÖHNE'S DNA

With every turn of its iconic "Waltzing Disc" at six o'clock the dial of the Waltz N°1 Skeleton breathes Viennese sentiment and celebrates the infinite precision of refined watchmaking skills.

MOVEMENT: 5401/180 SKELETON AUTOMATIC MOVEMENT

Held in stunning black PVD, the VMF5401/180 caliber movement's slender plate and bridges are rhodium-plated and are finished with careful precision by the hands of master craftsmen, which increases its preciousness. Each bridge and main plate has been openworked and beautifully decorated in the finest detail. Numerous internal angles adorn the main plate and bridges, requiring hours of work to decorate each piece by hand. Visible through the dial and glass case back, the off-centered micro-rotor is incorporated directly into the main plate and provides 42 hours of autonomy.

TECHNICAL DETAILS

MOVEMENT

Caliber 5401/180

in collaboration with Vaucher
Fleurier Manufacture

Winding: Automatic

Total dimensions – 13 ¼" – Ø 30.0 mm

Thickness – 2.6 mm
