
CARL SUCHY & SÖHNE PRESENTS

BELVEDERE MIDNIGHT

EFFORTLESS ELEGANCE SHINES ANEW IN THE DARK

Following the successful launch of the Belvedere at Time to Watches last year, Carl Suchy & Söhne is pleased to present another masterpiece in the Belvedere collection this year: the **Belvedere Midnight**.

Carl Suchy & Söhne wrote with the Belvedere Collection in 2023 a new, extremely successful chapter in its brand history. The sporty and elegant luxury wristwatch is presented in the unmistakable Viennese brand design and embodies a fascinating duality: the functional logic, sophistication and elegance of modernity on the outside, and the cultural heritage and charisma of Vienna masterfully interpreted by Carl Suchy & Söhne on the inside.

The Belvedere Midnight impresses with its deep black color scheme, the impressive shine of the resistant **DLC coating** and the **striking fluted bezel**. This all-black model gives the Belvedere an impressive radiance, an aura of sporty elegance and robustness.

The targeted emphasis on color and material underlines the sportiness of the Belvedere Midnight in subtle way. The elegance comes to the fore in an altered appearance, with the **golden second hand** shining with detail and functionality at the same time.

FUNCTIONS AND MOVEMENT

A special feature of the Belvedere wristwatches is the **unique date display**, which is also present in the Midnight version. The moving date window, which advances day by day, not only guarantees excellent legibility, but also creates a vibrancy on the dial - a sophisticated design reminiscent of the dynamic seconds disk of the Waltz N°1.

The CSS201 automatic movement, created by the renowned Swiss master watchmaker Marc Jenni especially for the Belvedere collection on the basis of the Dubois Depraz DB90000, ensures extremely precise timekeeping and thus emphasizes the outstanding quality of this unique watch. The golden rotor with the **micro-engraved façade of the world-famous Belvedere Palace** in the heart of Vienna and the embossing of the **baroque garden on the inside of the integrated rubber strap** underline the attention to detail of the collection.

TECHNICAL DETAILS

- Swiss-made
- Case: Black Steel (DLC)
- Diameter: 40.8 mm
- Lug-to-Lug: 43.9 mm
- Height: 12.2 mm
- Water resistant to 10 ATM / 100 meters
- Indications: hour, minute, and sweep seconds, moving date window
